Big grids. Big numbers.

100 Sudoku puzzles, printed one per page on a seven-inch grid, with digits about a third of an inch tall. Room to think, room for pencil marks, and none of the cramped little squares that make ordinary puzzle books tiring.

- 40 Easy, 35 Medium, 25 Hard — every one solvable by logic alone
- Each puzzle checked to have exactly one solution
- A how-to-play refresher and a three-step way in
- Full solutions at the back, six to a page

The Easy section can be finished by simple scanning, which makes it a gentle return for anyone coming back to Sudoku. The Hard section is a genuine step up.

Large print. One puzzle per page. A quiet half hour and a pencil.
