The puzzles in this book were generated algorithmically for this volume and each was verified to have exactly one solution. They are original to this book and do not reproduce puzzles published elsewhere.

For personal use. Printed in the United States of America.

If you enjoy this book, a review is genuinely appreciated — it helps more readers find it.

How to Play

The goal is simple: fill every empty square so that each row, each column, and each of the nine 3 × 3 boxes contains the digits 1 to 9, with no repeats anywhere.

The starting numbers are printed in heavy black. Everything else is yours to fill in — in pencil, so you can rub out a wrong guess.

A way in, if you are new to this

1. Look for a row, column or box that already holds eight digits. The missing digit is the one that has to go in the empty square.
2. Then look for a digit that can only fit in one square of a box. Count where it cannot go, and the answer usually falls out.
3. Never guess. Every puzzle here has one solution and can be reached by logic alone — guessing usually means an earlier mistake, so go back and check.

Full solutions start on page 109.

How This Book Is Arranged

The puzzles get harder as you go, and each section begins on a new page so it is easy to find your place.

Easy	puzzles 1–40 generous starting numbers — a comfortable warm-up
Medium	puzzles 41–75 fewer numbers, more thinking ahead
Hard	puzzles 76–100 for when the first two feel too easy
Solutions	page 109 onward

Large print, one puzzle to a page

Every puzzle here is printed on its own page, seven inches wide, with digits over half an inch tall. Nothing is squeezed to fit and no grid runs into the fold of the page. If your eyes tire easily, this is the format that helps most.
